Eval. Notes:	A standard compliance inspection was conducted at General Spray (GS). GS currently does not generate hazardous wastes. GS previously had one shipment of 50 gallon of acute hazardous waste. GS is a spray drying operation that performs spray drying on glass and ceramics. GS does not manufacture any glass or ceramics on site. GS contracts with glass and ceramic manufacturers. The manufacturers send their product to GS for spray drying. GS takes the materials it receives, mixes them with binding agents, and then spray dries the mixture. Spray dried products are then sent back to manufacturers for sale. GS occasionally generates sludges from spray drying operations. Generated sludges are non-hazardous. GS does not generate any hazardous waste on site. GS had generated a one-time shipment of hazardous waste in 2021. The previous owner of this location operated a vape shop. This vape shop had containers of nicotine on site. After purchasing the property, GS discovered approximately 50 gallons of nicotine on site. GS disposed of the nicotine as a P075 hazardous waste since they had no use for the nicotine. The approximately 50 gallons of P075 waste was shipped off site on 7/27/21 to Univar Solutions USA in NY. A site inspection consisted of a tour of the spray drying area and the warehouse. There was no hazardous waste noted on site at the time of this inspection. A review of documentation revealed that General Spray did not submit the 2021 biennial report. A violation will be issued for 40 CFR 262.41(a).
